

# AISHWARYA BODHE

Full-Stack Developer | Creating Scalable Web & Cloud Applications | Immediate Joiner  
Pune, India | +91 8317206235 | [aishwaryabodhe1122@gmail.com](mailto:aishwaryabodhe1122@gmail.com) | [Github](#) | [Portfolio](#)

## PROFILE SUMMARY

Software Engineer with 3+ years of experience designing and scaling high-availability, fault-tolerant distributed systems and full-stack cloud-native applications. Experienced with AWS and Google Cloud Platform (GCP), microservices architecture, scalable backend systems, and modern frontend frameworks (React, Angular). Strong in system design, data structures & algorithms, authentication/authorization, database optimization, and performance engineering, with proven end-to-end delivery from architecture to deployment, monitoring, and production support.

## SKILLS:

React.js, Node.js, Next.js, Express.js, Angular, SPFx, JavaScript (ES6+), Python, AI&ML Concepts, HTML5, CSS3, Bootstrap, RESTful APIs, API Integration, PostgreSQL, SQL, MongoDB, NoSQL, AWS, GCP, Github, CI/CD, Agile methodology.

## EXPERIENCE:

### Senior Software Engineer | PluginLive | July 2025 – Present

Assessment and data management platform for onboarding students: Built a campus hiring and onboarding platform using React.js, Node.js, PostgreSQL, and AWS, integrating AI-driven services via secure APIs. Developed an Assessment Platform to conduct aptitude, coding, and communication evaluations with AI-powered question generation, face detection, speech-to-text analysis, and malpractice detection. Implemented an ATS and data management system with role-based dashboards (students, institutes, corporates), enabling application tracking, report generation, and automated email notifications.

### Application development Analyst | Accenture solution PVT LTD | Dec 2024 – July 2025

Events manager calendar: Built a reusable and dynamic Events Manager Calendar using SPFx and React.js, driven by user inputs from SharePoint lists. Enabled full CRUD operations for events with Node.js and API integrations, including notifications, meeting links, and organizer details. Implemented timezone selection and conversion, displaying event times accurately based on user-selected timezones.

Data Archival Application: Developed an internal data management application using Angular, Node.js, Express, and AWS to store and manage large-scale datasets. Implemented time-based data lifecycle management, categorizing structured and unstructured data (JSON files and tabular formats) with advanced filtering. Enabled secure data archiving and quick retrieval, ensuring long-term preservation, compliance, and efficient data access.

### Application development Associate | Accenture solution PVT LTD | Dec 2022 - Dec 2024

Invoice Generator for orders: Developed a dynamic order management form using SPFx and React.js, featuring conditional dropdowns and input fields for industrial medicinal products. Implemented Node.js APIs with AWS to securely store, manage, and process order data with seamless backend integration. Automated email notifications and invoice PDF generation upon form submission, delivering complete order details to clients.

## EDUCATION:

Master of Business Administration in **Artificial Intelligence & Machine Learning** CGPA 8.7/10

D.Y. Patil COL, Pune (July 2023 – Aug 2025)

Bachelor of Engineering in **Information Technology** CGPA 8.37/10 Bharati

Vidyapeeth COEW, Pune (Aug 2018 – July 2022)

## **CERTIFICATIONS:**

Google cloud Associate

AWS Certified Developer
